

## Elements

### MMU Basic

- Brings medical equipment and supplies, and builds to a total of four tents with a logistics trailer & supply tent
- Maintains 25+ medical personnel
- Ability to care for a population at risk of up to 2000 residents
- Provides primary medical care with an emergency department and has four holding beds that rely on air/ground transport of patients to more definitive medical care facilities

### MMU +10

- Builds to a total of 5 tents with a logistics trailer & supply tent
- Maintains 25+ medical personnel
- Ability to care for a population at risk of 2,000 – 3,000 residents
- Ability to care for ten medical patients for an extended period of time
- Ancillary services include laboratory, radiology, pharmacy, medical supply

### MMU +30

- Builds to a total of 7 tents with a logistics trailer & supply tent
- Maintains 30+ medical personnel
- Ability to care for a population at risk of 3,000 – 5,000 residents
- Ability to care for thirty medical patients for an extended period of time
- Ancillary services include laboratory, radiology, pharmacy, medical supply

### MMU +50

- Builds to a total of 10 tents with a logistics trailer & supply tent
- Maintains 30+ medical personnel
- Ability to care for a population at risk of 5,000 – 8,000 residents
- Ability to care for fifty medical patients for an extended period of time
- Ancillary services include laboratory, radiology, pharmacy, medical supply

# TANEY COUNTY AMBULANCE DISTRICT MOBILE MEDICAL UNIT

**MMU Mission:** The Mobile Medical Unit (MMU) is a modular, scalable rapid response medical package. The MMU can be used to support any hospital in the State of Missouri that has been disabled or destroyed by natural disaster, fire, or in need of expanded surge capacity. The package contains 4 unique and distinct building blocks: MMU Basic, MMU +10, MMU +30 and MMU +50.

**Overview:** The MMU was purchased by Taney County Ambulance District through a grant provided by Missouri Health and Senior Services and Homeland Security. Based in Branson, Missouri the MMU could be deployed to support any hospital within the State of Missouri that is in need of expanded resources for surge capacity or has been disabled by disaster.

**Concept:** To deploy, set-up using SEMA (MO-1 DMAT) resources and staff until a transition can be made to local hospital staff and resources. This allows hospital staff to maintain their jobs in their own community, serving the people of that area.

**Location:** The MMU is located in Hollister, MO in a warehouse leased by SEMA. The facility is in close proximity to Taney County Ambulance District offices. This allows TCAD personnel quick access for equipment maintenance and medical supply rehab.
